## BIRD OF PARADISE

Whether you are celebrating your love of horticulture or simply looking for a colourful, maintenance-free flowering plant, we hope our interpretation of the exotic Bird of Paradise gives you hours of pleasurable LEGO® building.

## FROM THE DESIGN TEAM

Chris McVeigh travelled all the way from his native Canada to become a LEGO® designer at LEGO HQ in Billund, Denmark and this Bird of Paradise set is his first model in the LEGO Botanical range. Chris is particularly proud of the model's repositionable flowers and the fact that the model sways just like a real plant when placed in a light breeze.

## **STRELITZIA REGINAE**

This stunning flowering plant is indigenous to South Africa and can grow up to 2 meters (6.5 feet) tall. It produces a brilliant orange plume-like flower that resembles the head of a bird, which inspired the plant's more colloquial names, Bird of Paradise, or Crane Flower. The brilliant beauty of its flower tends to leave a lasting impression on anyone who sees it during their tropical travels.
