STAR WARS
Death Star II

1. The Death Star II is a massive space station that orbits the planet of Endor. It is the second and largest of the Death Stars, and is capable of destroying an entire planet.

2. The Death Star II is a spherical structure that is 160 kilometers in diameter. It is built from a complex network of corridors and rooms, and is capable of housing up to 650,000 troops.

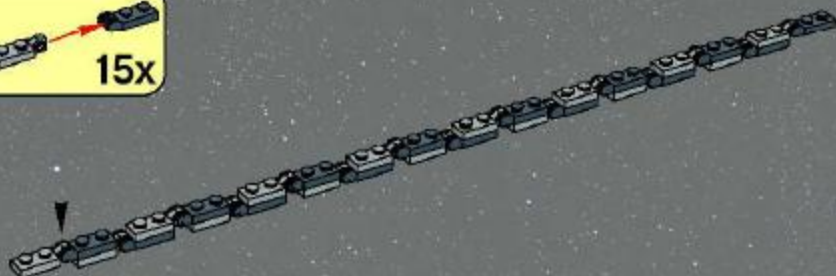

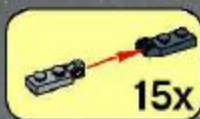

3. The Death Star II is a highly advanced piece of technology, and is capable of firing a powerful laser beam that can destroy an entire planet. It is also capable of launching a fleet of TIE fighters.

4. The Death Star II is a highly secure facility, and is protected by a powerful shield that can deflect incoming attacks. It is also capable of launching a fleet of TIE fighters.

5. The Death Star II is a highly advanced piece of technology, and is capable of firing a powerful laser beam that can destroy an entire planet. It is also capable of launching a fleet of TIE fighters.
