LEGO.com/service/buildinginstructions

Nintendo Entertainment System™ (NES™), launched in the U.S. in 1985, has set the foundation of the current video game industry in the West and introduced millions of players to the compelling worlds of Mario, Zelda, Metroid and more. Now held in high esteem by gamers all over the world, it's still "the control deck that puts you in control of incredible fun!"

Original Nintendo Entertainment System

Original packaging from 1985

LEGO® Designers
Daire McCabe,
Pablo Gonzalez and
Leon Pijnenburg

When we set out to recreate this classic TV and console combo, we wanted to do more than just build models that looked the part. We also wanted them to be packed with features and functions from the originals. That's why small but authentic details such as input/output slots, antennas and controls are there, and why you can place a Game Pak in the console, change channels on the TV and watch a "moving" image.

LEGO® Version

In the early 1980s, the team at Nintendo set an ambitious goal: to develop a new cartridge-based video game console that would deliver experiences that were then available only on powerful arcade counterparts. The NES would go on not only to offer the thrill of arcade games in the home, but to usher in entirely new types of experiences.

It was LEGO® designers Pablo Gonzalez, Leon Pijnenburg and Daire McCabe who took up the challenge of creating LEGO replicas of both the NES and a retro-styled 1980s TV. Luckily the size of a number of existing LEGO elements matched closely with key visual details on the original console and controller, allowing the designers to construct models that were as close to true-to-scale as possible. The TV, while not 1:1, actually matches the instructional drawings in the original booklet that came with the NES when it launched. How successful were the LEGO designers? Simply pick up the controller and experience how your "muscle memory" kicks in – all the controls and buttons are exactly where your thumbs remember them to be!
